THE NEW GENERATION OF ADVANCED TEST EQUIPMENTS FOR RELAYS, ENERGY METERS, TRANSDUCERS AND POWER QUALITY METERS

www.isatest.com
The new generation of advanced test equipments for relays, energy meters, transducers and power quality meters

- Testing all relay technologies: electromechanical, solid state, numerical and IEC61850
- Manual control with color display
- Simultaneously available: 3 Current and 4 Voltage plus 1 battery simulator outputs
- High current outputs: 3 x 32 A, 1 x 96 A
- High power outputs: 3 x 430 VA, 1 x 1000 VA
- High accuracy outputs: better than 0.05%
- IEC 61850 protocol interface
- USB and Ethernet interface
- Pen drive interface
- Internal GPS and IRIG-B interface for end-to-end tests
- Advanced testing and data management software TDMS
- Complete library of relays from the major manufacturers
- Highest quality, safety and reliability

### SPECIFICATIONS

DRTS 34 is the leading edge, most powerful and accurate relay, energy meters (class 0.1) and transducers test set manufactured by ISA. The locally and PC controlled test set generates high precision (0.05% accuracy) signals using multiple DSP technology.

Four hardware configurations are available:
- **DRTS 66**: with 6 Current 6 Voltage generators plus 1 battery simulator
- **DRTS 64**: with 6 Current and 4 Voltage generators plus 1 battery simulator
- **DRTS 34**: with 3 Current and 4 Voltage generators plus 1 battery simulator
- **DRTS 33**: with 3 Current and 3 Voltage generators plus 1 battery simulator

Its powerful current outputs (3 x 32 A at 430 VA) and voltage outputs (3 x 300 V at 100 VA) allow to test any type of relays including electromechanical relays.

The test sets integrate the IEC 61850 protocol interface for testing relay with Ethernet-based substation communication protocol.

### APPLICATION

DRTS 34 can test all the following relays

<table>

### OPERATOR INTERFACE

DRTS 34 can be operated directly from the front panel by means of a large color graphical display, a rotary selector, a keypad and function keys. Two PC interfaces, USB and Ethernet, allow to control the test set with the advanced testing software TDMS. It can also be operated by the optional Local Touch Control (touch screen) module that can be used attached or detached from the test set.

</tbody>
</table>

- Ranges: 12.5 V and 300 V.
ANALOG DC MEASURING INPUTS

- DC Current measuring input
  - Measuring range: ± 20 mA and ± 5 mA.
  - DC accuracy, 20 mA: ± 0.02% of value ± 0.01% of range.
  - DC accuracy, 5 mA: ± 0.05% of value ± 0.02% of range.
  - Connections: 4 mm banana sockets.
- DC Voltage measuring input
  - Measuring range: ± 10 V.
  - DC accuracy: ± 0.02% of value ± 0.01% of range.
  - Connections: 4 mm banana sockets.

NOTE: all specifications apply at 25 °C ± 2 °C.
AC specifications apply for sinusoidal waveform and frequency between 48 and 62 Hz. Temperature drift: ± 0.01%/°C.
Current outputs derating at 115 V AC power supply.

INTERFACE CONNECTIONS

Type of interfaces: USB, Ethernet, IEC 61850, IRIG-B.
Characteristics of USB interface:
- Transmission rate: 3x minimum.
- Interface cable: 2 meters, included.
Characteristics of the ETHERNET interface:
- Connector type: RJ-45.
- Interface cable: 2 meters, included.
Characteristics of the IEC61850 interface (optional):
- Connector type: RJ-45.
- Interface cable: 2 meters, included.
Characteristics of the IRIG-B connection (optional):
- Fiber optic connector, ST type.

Internal memory

256 Mb internal memory suitable to store in the test set approximately 2.000 test results.

Pen drive interface

It allows saving and recalling local test setting and results.

DISPLAY - KEYPAD - FUNCTION KEYS - ENCODER

- One Encoder: digital rotary switch.
- One Keyboard: 12 keys.
- Five Function keys.
- Display: 256 colours, type LED, graphic 320 x 240 pixels; dimension 5.7 inches.

POWER SUPPLY

- Mains power supply: 85 to 264 V AC, sinusoidal, single phase.
- Frequency: 45 to 65 Hz.
- Power consumption:
  - Stand-by: less than 150 W;
  - maximum load, 115 V supply: 1600 W;
  - maximum load, 230 V supply: 2700 W.
- Connection: Standard 16 A AC socket.

WEIGHT AND DIMENSIONS

Weight: 18 kg (39 lb).
Dimensions without the handle: 150 (h) x 466 (w) x 423 (d) mm (5.9 x 18.3 x 16.9”).
ACCESSORIES SUPPLIED WITH THE UNIT
Protective carrying bag.
Set of test leads: 12 cables.
Power supply cable.
Ground connection cable.
USB and Ethernet cables.
Instruction and maintenance manuals.

APPLICABLE STANDARDS
Electromagnetic compatibility:
Low voltage:
Operating temperature: 0 - 55°C;
Storage: -25°C to 70°C.
Relative humidity: 5 - 95%, without internal condensation.
Altitude: < 2000 m.
Applicable also to external amplifiers AMI 332 and AMI 632.

OPTIONAL ACCESSORIES
EXTERNAL AMPLIFIERS
AMI 332 - CURRENT AMPLIFIER 3X32A
The three phase current amplifier AMI 332 is an additional device to DRTS 34. The option requires IRIG-B connection and output extension module on DRTS 34 and it includes three current generators at 32 A each. In connection with the DRTS 34, the option offers the following features:
. To control 6 currents at 32 A each at the meantime, for the test of windings transformer protection relays;
. To have a three phase generator at 64 A per phase;
. To have a single phase generator at 96 A.

Current Generators

<table>
<thead>
<tr>
<th>POWER</th>

</tr>
<tr>
<td>1 x 0 ... 96 A AC</td>
</tr>
<tr>
<td>1 x 1000 VA at 64 A AC</td>
</tr>
</tbody>
</table>

AMI 332 - Technical Specification
Accuracy: Typical 0.02% of the value ± 0.01% of the range; guaranteed 0.04% of the value ± 0.01% of the range.
Distortion: 0.05% Typical - 0.15% guaranteed.
Resolution: 1 mA.
Connections: 4 mm banana sockets.

AMI 632 - CURRENT AMPLIFIER 6X32A
The six phase current amplifier AMI 632 is an additional device to DRTS 34. The option requires IRIG-B connection and output extension module on DRTS 34 and it includes six current generators at 32 A each. In connection with the DRTS 34, the option offers the following features:
. To control 9 currents at 32 A each at the meantime, for the test of three windings transformer differential protection relays;
. To have a six phase generator at 32 A per phase;
. To have three phase generator at 64 A per phase;
. To have a single phase output at 96 A.

AMI 632 - Technical Specification
Accuracy: 0.02% of the value ± 0.01% of the range, Typical; 0.04% of the value ± 0.01% of the range, guaranteed.
Distortion: 0.05% Typical; 0.15% guaranteed.
Resolution: 1 mA. Connections: 4 mm banana sockets.

Power supply for AMI 332 and AMI 632
- Mains power supply: 85V to 264 V AC, sinusoidal, single phase.
- Frequency: 45 to 65 Hz.
- Power consumption:
  . at rest: less than 150 W;
  . maximum load, 115 V supply: 800/1600 W;
  . maximum load, 230 V supply: 1300/2700 W.
Connection: Standard 16 A AC socket.

Accessories supplied with the units
Protective carrying bag, power supply cable, test leads kit and connection cable to DRTS 34.
IN2-CDG CURRENT BOOSTER FOR 1 A RATED HIGH BURDEN RELAYS

The option IN2-CDG includes a set of three current transformers, with the following characteristics:
- Primaries: 12.5 A and 15 A.
- Secondaries: 0.5 A; 1 A; 2.5 A; 5 A.

Nominal power: 100 VA. Current ratio error: 0.2%.
Case: plastic.

For the single phase test of the CDG relay it is possible to have three times the above power, connecting current outputs in series.

HPB 600 AND HPB 400 CURRENT BOOSTERS

These options are aimed at testing old electro-mechanical overcurrent relays; in particular, at relays rated 1 A. The power output is so high that it can test even relays rated at less than 1 A. Other features for HPB 400:
- Primary current: 32 A.
- Secondary currents: 20 A, 4 A, 1 A.

Other features for HPB 600:
- Primary current: 2 x 32 A.
- Secondary currents: 20 A, 10 A, 4 A, 1 A.

For both options:
- Accuracy: 0.5% at half burden; 1% at full burden.
- Connections: two safety sockets for the primary side; four safety sockets for the secondary side.

EXTERNAL GPS SYNCHRONIZER

The option includes:
- the antenna;
- an extension cable for the antenna, 20 m long.

This option is to be specified at order.

HPB 600 AND HPB 400 CURRENT BOOSTERS

These options are aimed at testing old electro-mechanical overcurrent relays; in particular, at relays rated 1 A. The power output is so high that it can test even relays rated at less than 1 A. Other features for HPB 400:
- Primary current: 32 A.
- Secondary currents: 20 A, 4 A, 1 A.

Other features for HPB 600:
- Primary current: 2 x 32 A.
- Secondary currents: 20 A, 10 A, 4 A, 1 A.

For both options:
- Accuracy: 0.5% at half burden; 1% at full burden.
- Connections: two safety sockets for the primary side; four safety sockets for the secondary side.

TRANSCOPE: ANALOG/DIGITAL RECORDER AND MEASUREMENT FUNCTION

Optionally the test set can be provided with this feature to measure and record the following:
- 10 voltages or currents (with clamps or external shunts) AC and DC meter and recorder;
- Phase angle, wattmeter, frequency, harmonics meter, power quality meter;
- Oscilloscope functions;
- Sequence of Event recorder (up to 10 digital inputs);
- Fault recording function.

Input characteristics:
- Five isolated groups of two input circuits each.
- Inputs ranges: 100 mV; 1; 10; 100; 600 V.
- Input impedance: 500 kOhm, 50 pF.
- Measurement accuracy: ±0.06% typical; ±0.15% guaranteed.
- Sampling frequency: 5 kHz, 10 kHz, 20 kHz, 50 kHz, software selection.
- Total buffer size: 4 Mbytes.
- Maximum recording duration:
  - at 5 kHz: 6 min for 1 input channel / 40 s for 10 input channels.
  - at 50 kHz: 40 s for 1 input channel / 4 s for 10 input channels.

Connections: 4 mm banana sockets.
This option is to be specified at order.

INTERNAL GPS SYNCHRONIZER

The GPS synchronizer is an internal module that allows to synchronize the test start of two DRTS 34 or other test sets.

ITC 61850 INTERFACE

The standard IEC61850 describes the communication of devices in substations. IEC61850 messages coming from the devices connected to the substation network are also called GOOSE. GOOSE messages describe binary status signals over the substation network and are also used for relays tripping.

For relay testing applications within IEC61850 substations it is necessary to access these data. This new feature is performed by the ISA Automatic Relay Test Set DRTS 34.
By means of a dedicated hardware and by the TDMS software, ISA DRTS 34 can expand its testing capabilities by handling IEC61850 messages.

The IEC61850 Interface option for DRTS 34 is required for relay testing with Ethernet-based substation communication protocol. The IEC61850 Interface is mounted on the front panel of DRTS 33. The option has to be specified at order.

IEC 61850-9 option allows generating measurement messages on the system bus. The option and the associated software provide the following features:

- injection of Sampled Values on the system bus, corresponding to CT and VT measurements;
- test of relays connected to the system bus, by the generation of Sampled Values and the monitoring of the relay tripping, as described above.

The connection is performed via an optical fiber connector, mounted on the rear of the test set. The option has to be specified at order.

RELAY CONNECTION CABLE KIT

This option can be added to the basic cable kit to provide connection to all test set sockets. It includes also 20 adaptors for terminal block connections and 3 jumpers to parallel current outputs.

Optional set of testing cables

TRANSIT CASE

Three options are available:

- Heavy duty plastic transport case (Discovery type)
- Heavy duty transport case
- Soft carrying bag

PLCK POLARITY CHECKER MODULE

Checking the correct connection of CT’s and VT’s to protection relays is a problem because relays can be hundreds of meters away from the transformer. PLCK easily solves the issue. When this test is started, DRTS 34 generates a special, not sinusoidal waveform, which is injected into the connection cables. The polarity check is easily performed by connecting it at the relay site. PLCK has two lights: green and red. The green light turns on when the polarity is correct; the red light turns on when the polarity is wrong.

PLCK POLARITY CHECKER
OPTIONAL LOCAL TOUCH CONTROL

With the optional Local Touch Control the unit can be easily controlled using the rugged touch screen and the Manual Control software applications. The Local Touch Control can be used attached or detached to the test set. When used attached to the test set the rugged Touch Local Control is fixed to the test unit by means of a robust hinged module. If detached from the test set the Local Touch Control unit can be easily managed as a rugged tablet touch screen controller.
