CBA1000
CIRCUIT BREAKER ANALYZER AND MICROOHMMETER

www.isatest.com | www.altanova-group.com
Circuit Breaker Analyzer and MicroOhmmeter

- Circuit Breaker timing test set
- Built-in 200 A microOhmmeter
- 16 timing channels
- Up to 4 trip/close coils control
- Motion and speed analyzer
- Static and dynamic contact resistance measurement
- Suitable for EHV, HV and MV circuit breakers
- Stand alone functionality - no PC connection is required

A P P L I C A T I O N

CBA 1000 is a unique tool for the complete test of all circuit breakers. It is a powerful timing and motion analyzer test set with built-in 200 A pure DC current microOhmmeter for static and dynamic contact resistance tests.

CBA 1000 is a stand alone unit with a large graphical display. The unit is supplied with TDMS analysis software. TDMS performs test results analysis and creates test reports; it allows also to pre-define test plans. TDMS is also a powerful Test and Data Management software, compatible with all ISA Test Sets.

All CBA 1000 circuits have been designed to ensure safe and reliable operations in the noisy environment of HV / MV substations and power plants.

C H A R A C T E R I S T I C S

Coil operation
- Number of circuits: 2 (1 Open and 1 Close coils); optional 4 (3 Open and 1 Close coils).
- Type of driver: electronic; it ensures superior timing control.
- Driver characteristic: 300 V DC max; 30 A DC max.
- Operating time accuracy: 0.025% of delay ± 100 µs.
- Measurement of the coil current: one per channel; the waveform is displayed on the dedicated channels.
- Coil current ranges: 2.5; 10; 25 A full scale, user selectable.

- Large graphical high brightness sunlight display
- Analysis and result evaluation directly on the display
- Internal memory for up to 250 test results and 64 pre-defined test plans.
- Cross trigger for the synchronization of up to 4 CBA 1000
- Circuit Breaker test with both ends connected to ground (BSG option)
- TDMS software for test results analysis and reporting.

- In case of 4 coils option, it is possible to select the single or multiple phase opening.
- Coil current measurement accuracy: 0.5% of the reading ± 0.1% of the selected range.
- Outputs are isolated between them.

Main contact inputs
- Number of contact inputs: 6 Main contacts (2 break per phase) plus 6 Resistor contacts (2 break per phase).
- Resistor contact ranges: from 20 Ohm to 10 kOhm.
- Contact test voltage: 24 V. Main contact test current: 50 mA.
- Each input group is isolated with respect to the others.

Event inputs
- Number of auxiliary event inputs: 4, divided in 2 groups of 2 each.
- Capability of testing dry (24 V) or wet contacts (20 to 300 V).
- Test current: 2 mA.

Sample rates
20 kHz - 10 kHz - 5 kHz - 2 kHz - 1 kHz - 500 Hz - 200 Hz - 100 Hz, 50 Hz, 20 Hz user selectable.

Timing accuracy
100 µs ± 0.025% of the time reading at 20 kHz.

Maximum record length
1000 s.
Analog inputs
- Number of analog inputs: 4 (6 Optional).
  - 2 (4 optional) dedicated to Open and Close coil currents.
  - 1 dedicated to Dynamic and Static Resistance Measurement. Input voltage range: ± 5 V.
  - 1 dedicated to travel, velocity, station battery voltage, etc. Input voltage range: ± 5 V; ± 50 V; ± 500 V, user selectable.
- Analog inputs are isolated with respect to all other circuits.
- Analog input measurement resolution: 16 bit.

Programmable sequences
- The user can select the following Open and Close sequences:
  - Open; Close; Open-Close; Close-Open; Open-Close-Open.

Static and Dynamic resistance measurement (Option)
- DC Test current: 200 A, 100 A, 20 A.
- Resistance measurement ranges 200 μOhm; 1 mOhm; 10 mOhm; 100 mOhm, user selectable.
- Resolution: 0.1 μOhm; 1μOhm; 10 μOhm; 100 μOhm.
- Resistance measurement accuracy: 1% of the reading ± 0.2% of the range.

Minimum trip Voltage test (Option)
The minimum trip voltage test allows to verify the minimum trip voltage threshold and the voltage drop-offs delays.
- Two options: 250 V Max and 70 V Max.
- Maximum current: 4 A (250 V); 10 A (70 V).
- Maximum voltage adjustment: up to 50% of V Max.

Internal or external Printer (Option)
- Optional internal thermal printer 58 mm wide.
- Optional external thermal printer: Seiko DPV-414, 112 mm wide.

Test set control
- The control is local, via graphical display, keypad and pushbutton for menu selection: no PC control is necessary.

Display
- Large graphical high brightness sunlight display (viewing area 122 x 92 mm).
- Test results are displayed graphically and in table format. Zoom functions and cursors for test data analysis are directly available on the CBA 1000 display.

Interfaces to PC
- 2 available interfaces: USB and RS232.

Memory size
- 128 Mbytes (approx. 250 results).

TDMS software
- TDMS is a powerful software package, providing data management for commissioning and maintenance testing activities. Circuit breaker data and test results are saved in the TDMS database for historical results analysis.
TDMS software has the following main features.
- Full control of CBA 1000 functions from PC.
- Download of test plans.
- Download of test results.
- Test plans and test results can be viewed, edited in the missing descriptions, saved, printed, exported.
- Possibility of viewing, overlaying and gluing more results, for an easy test result comparison.
- Possibility to pre-set test plans and to upload them into the test set.
- Two cursors select measurement points and intervals.
- Zoom in and out feature.
- Enhanced measurement features for movement - speed - acceleration control.

ISA software updating policy allows all users to update their software from the ISA web site www.isatest.com, at no additional cost.

Other characteristics
CBA 1000 can operate both from mains (AC or DC) and from an internal rechargeable battery:
- Mains supply:
  - From 85 to 265 V AC; 50-60 Hz.
  - From 100 to 350 V DC.
- Internal battery. Battery type: NiMh.
- Case: aluminium, with hinged removable cover and handle.
- Dimensions: 400(W) * 300(D) * 240(H) mm. Weight: 10 kg basic unit; 11 kg with Microhmmeter module.

STANDARD ACCESSORIES
The following accessories are supplied with the unit:
- Mains cable
- User’s manual for hardware and software
- Serial cable
- Grounding cable
- USB cable
- Spare fuses
- Software TDMS.

OPTIONAL ACCESSORIES
The following options are available upon request:
- Basic unit test cable kit
  The set includes:
  - N. 3 Cables for connection to Main contacts;
  - N. 2 Cables for connection to Auxiliary contacts;
  - N. 1 Cable for connection to Breaker Coils.
  - N. 1 Cable for Low Voltage Measurement.
  - N. 1 Kit of adaptors and N. 1 adaptor 15 cm long.
  - N. 1 Cable for connection to Trasducers.
  - N. 1 Kit of auxiliary cables and a kit of crocodile clamps.
  - Transport Plastic bag.
- Additional 2 Open driving coils module
  This module increases to 3 the number of Open Coils.
- Built-in 200 A Static / Dynamic resistance module
  with 10 m long test cables, cross section 25 sq.mm, terminated with high current clamps.
- Minimum trip Voltage test
- Internal thermal printer. CBA 1000 has an (optional)
  built-in thermal printer, 58 mm wide.
- BSG 1000
  is an enhanced safety external module, that allows to test the circuit breaker with both sides connected to ground.
- CBA Heavy duty transport case with wheels.
- CBA plastic soft bag.
- Linear transducer
  - Linear transducer: TLH 150 - 150 mm length (IP40).
  - Linear transducer: LWG 150 - 150 mm length.
  - Linear transducer: TLH 225 - 225 mm length (IP40).
  - Linear transducer: LWG 225 - 225 mm length.
  - Linear transducer: TLH 300 - 300 mm length (IP40).
  - Linear transducer: TLH 500 - 500 mm length (IP40).
  - Linear transducer: LWG 500 - 500 mm length.
- Pressure transducer: PA-21 Y 40 BAR.
- Rotary transducer: IP 6501 - 355° rotation angle.
- Universal transducer mounting kit for TLH, LWG and IP travel transducers.
- Hall effect clip-on transformer. It allows measuring the DC current of motors and of the auxiliary supply.

APPLICABLE STANDARD
The test set conforms to the EEC directives regarding Electromagnetic Compatibility and Low Voltage instruments.
- Electromagnetic Compatibility:
- Low Voltage Directive:
  Directive 2006/95/EC (CE conform).
  - Applicable standards, for a class I instrument, pollution degree 2, Installation category II: CEI EN 61010-1.
  In particular:
  - Inputs/outputs protection: IP 2X - CE EN 60529.
  - Operating temperature: -10°C to 55 °C; storage: -20°C to 70 °C.
  - Relative humidity: 10 - 95% without condensing.

Options with * must be specified at order.
Options with ** are exclusive each other: code 33166 Internal thermal printer cannot be ordered together with code 34166 Minimum Trip Voltage Test Module.
Safe Circuit Breaker test with both sides grounded

- Option for ISA Circuit breaker Analyzers CBA 1000 and CBA 2000
- Work safely while testing
- Save circuit breaker testing and analysis time
- Preserve all timing and motion test integrity
- BSG 1000 allows the test of circuit breakers using Graphite Nozzle
- This method applies to all kinds of circuit breakers.

INTRODUCTION

With the BSG option it is possible to perform the circuit breaker timing test with both sides grounded. The grounding connection is NOT removed during the test, as it has to be with conventional test equipment. Safety is becoming more and more important, and several laws and regulations all around the world prescribe that, at the work location in high voltage installation, all parts which are to be worked on, shall be earthed (grounded) and short circuited. While testing a Circuit Breaker in high voltage substations the situation may become dangerous due to the high electric potential. This can be caused by a capacitive coupling from a close conductor or when lightning strikes the line somewhere, or when a fault occurs during the test and a high potential reaches the circuit breaker.

To improve personnel safety, reduce hooking time and preserve the test set integrity, the use of BSG 1000 is the best practice. BSG 1000 is also the best solution for testing Circuit Breakers equipped with Graphite Nozzles.
Two BSG 1000 types are available:
- BSG 1000- type 1 for testing one break per phase;
- BSG 1000- type 2 for testing two breaks per phase.

Each BSG 1000 is made of the following elements:
- **Three BSG Remote Heads**, connected close to the main breaker contacts.

**Remote Heads for BSG 1000- type 1**
- Each head has two cables, 2.5 m long, cross section 4 mm², terminated with crocodile clamps.
- One bipolar shielded cable, 3 m long, terminated with crocodile clamps.
- One 8 m long cable, terminated with multi-pole connectors for the connection between Remote Heads and the BSG Main unit.

**Remote Heads for BSG 1000- type 2**
- Each head has three cables, 2.5 m long; cross section 4 mm², terminated with crocodile clamps.
- Two bipolar shielded cables, 3 m long, terminated with crocodile clamps.
- One 8 m long cable, terminated with multi-pole connectors for the connection between Remote Heads and the BSG Main unit.
- One BSG Main unit, connected to the CBA 1000 or CBA 2000 circuit breaker analyzer.
- Connection of BSG Main Unit to CBA 1000: via a cable 1 m long, terminated with a multi-pole connector.

**SPECIFICATION**
- Number of main contact inputs (type BSG 1000-1): 3, divided in three groups.
- Number of main contact inputs (type BSG 1000-2): 6, divided in three groups of two each.
- Test current injection: 20 A DC nominal.
- Maximum test duration (each test): 1 s
- Graphite nozzles test selection in the menu.

**Mains supply**
- From 85 to 265 V AC; 50-60 Hz, and:
- From 100 to 350 V DC.
- Maximum supply current: 1 A @ 85 V AC.

**Weight and dimensions**
- **BSG 1000 main unit**
  - Case: aluminium case, with hinged removable cover and handles.
  - Weight: 6 kg
  - Dimensions: 325 x 180 x 285 (W x H x D)

- **BSG 1000 remote heads (three units)**
  - Case: die-cast aluminium case.
  - Weight: 0.7 kg (without cables)
  - Dimensions: 125 x 56 x 125 (W x H x D)
