Modular DC Hipots

TESTING APPLICATIONS
Perform precise DC hipot testing of electrical switchgear, cables, motors, generators, and protective equipment

DESCRIPTION
Phenix Technologies offers Modular DC Hipots with 1 to 6 stackable modules mounted on a mobile base that will generate a DC voltage in increments of 100 kV DC up to 600 kV DC.

Each module is rated for 5 mA and is air insulated. Cooling AN (Air–Natural, Convection). Both models offer reversible polarity.

Each model consists of a base with casters, corona rings, a control cabinet, a regulator cabinet, and the required number of modules to reach the desired voltage.

100-600 kV

➤ Lightweight and rugged for ease of mobility
➤ Expandable
➤ Air insulated design

Model 4500-5ST-100

Specifications are subject to change without notice.

Brochure No. 40202
SAFETY and DESIGN FEATURES

- Stackable modules utilizing unique spring loaded contact design
- No wires between modules
- Expandable from 100 kV DC to 600 kV DC
- Reversible polarity
- Zero Start interlock
- External interlock provision
- Motorized control of output voltage
- Multi-range digital metering
- Guard circuit to eliminate stray leakage current from specimen under test
- Ripple <5%
- Operation/maintenance manual

OPTIONS

- Input power cable (length and receptacle required to be specified)
- Computerized controls
- Discharge device
- HV series resistor
- Ground stick
- Discharge stick
- Reusable shipping containers

ENVIRONMENTAL CONDITIONS

- 10-40°C, indoor/outdoor in fair weather
- Humidity <95% non-condensing
- Altitude <3300 ft (1000 meters)

Ground Stick

Model GS100-2 Ground Stick, 2-piece design, with a 25’ (8 m) ground lead

Discharge Stick

Model DS100-2 Discharge Stick (100 kV, 100 kΩ, 50 kJ), 2-piece design, with a 25’ (8 m) ground lead

CONTROLS AND METERING

Phenix Technologies uses the latest development in computer-assisted controls. Our configuration creates ease in setup and simplicity in testing. The test system features a large 10” full color touch screen liquid crystal display and Ethernet port to select automation modes through a remote personal computer interface.

### Cables Included
- Input Power Cable: optional
- Power Interconnect: 50’ (15 m)
- Meter Interconnect: 50’ (15 m)
- Control Interconnect: 50’ (15 m)
PHENIX Technologies is committed to providing leadership, innovation, technology, quality, and service in all areas of our business.

Our 80,000 square-foot headquarters is a modern manufacturing facility. All aspects of electrical, mechanical, and software design and production are performed in this facility and controlled by an ISO9001 certified quality program. Our engineers offer a unique blend of theoretical knowledge and practical experience. Our Service and Calibration Department assists customers during and after installation to ensure years of trouble free service.

We carry our commitment into the future as we proudly continue to provide the best in high voltage, high current, high power test systems and components.
